The examples of Planning presented below are early insights/suggestions towards the implementation of the 1+2 approach. These suggestions are neither exhaustive nor prescriptive, nor are they intended to set or pre-empt policy. They represent current thinking at the time of their publication, and their authors may subsequently reconsider elements of them as practice evolves.

INTRODUCTION

“We will introduce a norm for language learning in schools based on the European Union 1 + 2 model - that is we will create the conditions in which every child will learn two languages in addition to their own mother tongue. This will be rolled out over two Parliaments, and will create a new model for language acquisition in Scotland.”

Scottish Government manifesto commitment, 2011

RATIONALE OF THE 1+2 PRIMARY PILOT PROJECTS

- To **embed** L2 into the life of the school, and teach it at all levels from P1 to P7
- To use **L2** as much as possible for **classroom interaction** (modelled on the “Immersion approach”), using gesture and expression if necessary
- To create **relevant** and **meaningful** learning contexts for L2 through **interdisciplinary** learning
- To work with practitioners to plan **collaboratively** to ensure **coherence** and **progression** in the language learning experiences provided for all learners

CURRICULUM FOR EXCELLENCE, MODERN LANGUAGES, INTRODUCTORY STATEMENTS

The **1+2 pilot project** is planned around the **three key Introductory Statements** of the CfE Modern Languages (see below). Suggested Learning Experiences align with the **seven Principles of Curriculum Design**, focusing specifically on **progression, relevance and challenge and enjoyment**.

“Learning a new language encourages pupils and young people to broaden their horizons as they explore the language and its associated culture. Through my learning of a new language:

- *I gain a deeper understanding of my first language and appreciate the richness and interconnected nature of languages*
- *I enhance my understanding and enjoyment of other cultures and of my own and gain insights into other ways of thinking and other views of the world.*
- *I develop skills that I can use and enjoy in work and leisure throughout my life.”*

CfE Modern Languages Framework

GENERIC PRINCIPLES

Responsibility of All

Literacy, Numeracy and Health and well-being remain the responsibility of all practitioners. Aspects of all three, but particularly literacy, will be a natural part of modern language lessons. Through learning how another language works, pupils can understand their own language better.

The study of another language **plays an important role in all language learning and the development of literacy skills**.

“Literacy is fundamental to all areas of learning, as it unlocks access to the wider curriculum. Being literate increases opportunities for the individual in all aspects of life, lays the foundations for lifelong learning and work, and contributes strongly to the development of all four capacities of Curriculum for Excellence”

PLANNING FOR PROGRESSION – P3&P4 / Block 3 – SPANISH

“The open-ended nature of the experiences and outcomes allows for **creativity** and **flexibility** and allows primary teachers to focus on teaching methodologies for **skills development** and for a **deeper understanding** without having to plan for too much content/topic coverage.”
 CFE Modern Languages Principles and Practice

The 1+2 pilot projects will provide pupils with a range of meaningful language learning experiences which will allow for early achievement of some or all of the second level outcomes and, in the longer term, opportunities for depth and breadth of learning.

Practitioners are expected to build on prior learning and teaching by revisiting and recycling language previously learned.
