

Team Challenge

Team challenge: can the team “doctor” (Learner 4) bandage a “patient” (Learner 3) with toilet paper, as the “nurse” (Learner 2) names, in French, the mini-card handed over by the “paramedic” (Learner 1) who selected it to match the French word from the pile of cards which the practitioner gave to each group.

The first team to successfully treat their patient wins.

1. Learner 1 (the paramedic) picks a mini-card with the written French for a part of the body.
2. He / she selects the matching picture and passes it to Learner 2 (the nurse). (Reading and understanding French)
3. Learner 2 tells Learner 3 (the doctor) the name for the picture he / she got from Learner 1. (Identifying and naming in French)
4. Learner 3 has to bandage the corresponding part of the body of Learner 4 (the patient). (Listening and understanding French)

Each team gets 4 different cards so the practitioner can evaluate whether they identified the language correctly.

Points are given for accuracy, speed, neatness of the bandage - which scores higher if it stays on!
